

# Global One Health Network (GIHN)

## Highlights of the Webinar on Research Enabling Platforms (REP) 23 November 2020

**Organised by the Knowledge Transfer Team:  
Melanie Rock, Hélène Carabin, Christina  
Zarowsky & Muriel Mac-Seing**

### REP 1

#### Detection

Evaluating governance in information and surveillance systems

Prioritize governance issues

Identify frameworks for governance evaluation

#### Co-Leads

Cécile Aenishaenslin &  
Hélène Carabin,  
Université de Montréal

Demonstrate and generate evidence through  
case studies: Surveillance of AMR and EID **Erin  
E. Rees & Victoria Ng**

#### Collaborators

Erin E. Rees  
Victoria Ng  
Maria Esther Perez  
Eyaba Guy Tchamdja  
Ronald Labonté

Case study: The Canadian Integrated  
Program for Antimicrobial Resistance  
surveillance (CIPARS) **Sarah Medinoui**

Case study: Global Public Health  
Intelligence Network (GPHIN)

### REP 2

#### Governance in prevention and control programmes

Scoping review of barriers and enablers to the  
implementation of governance to prevent or  
control IDs and AMR

Identify frameworks for governance evaluation:  
Exploration of alternative models of evaluating  
governance

#### Co-Leads

Aidan Hollis, University  
of Calgary  
Kate Zinszer,  
Université de Montréal

Case study in Alberta: Provincial AMR  
strategy

Case study in Québec: Assessment of  
rodent-targeted interventions against  
Lyme disease

### REP 3

#### Institutionalization

Towards better governance of zoonotic disease  
risk: One Health principles in the coronavirus  
(COVID-19) response (CIHR)

Case studies in Brazil, Ecuador, Mexico  
and Rwanda to assess the One Health  
response to ID and COVID-19

#### Co-Leads

Mary Wiktorowicz, York  
University  
Suzanne Hindmarch,  
University of New  
Brunswick

Governance of AMR: Accountability  
frameworks for national AMR strategies

Performance accountability in the prevention  
of ID in maternal care (HIV/HAIDS, malaria, TB)  
in sub-Saharan Africa

Evaluating the governance of emergent  
pandemic zoonoses: A systems and level  
analysis (CIHR) **Tara Penny & Mary  
Wiktorowicz**

### REP 4

#### Equity considerations in the global governance of infectious diseases and AMR

Identify extent to which equity considerations  
are present in the global governance of ID and  
AMR

Contribute to embedding equity goals in global  
governance of ID and AMR

#### Co-Leads

Ronald Labonté,  
University of Ottawa  
Sean Hillier, York  
University

Formulate specific policy recommendations to  
ensure equity considerations are central in  
global governance of ID and AMR

#### Collaborators

Arne Ruckert & Aisha  
Barkhad

Develop health equity impact assessment  
toolkit

**Didier Wernli, Eyad Shedeed, Phaedra Henley,  
Anahi Dreser Mansilla, Jennifer Hegewisch  
Taylor, Mayumi Makiwoto, Richar Ivan  
Rodriguez Hidalgo, Valdilea Veloso**
