Institutionalization: Evaluate governance approaches Covid-19 research in progress

- | | |
|-----------|---|
| 2020-2022 | <p>Towards Better Governance of Zoonotic Disease Risk: One Health Principles in the Coronavirus (COVID-19) Response (CIHR-funded)</p> <p>Scoping review of governance of risk of zoonotic disease emergence</p> <p>Case studies in Brazil, Ecuador, Mexico, Rwanda to assess the 'One Health' response to ID and Covid-19</p> |
| 2020-2021 | <p>Evaluating the Governance of Emergent Pandemic Zoonoses: A Systems and Legal Analysis of Wildlife Trade (CIHR-funded)</p> |
| 2020-2021 | <p>Impact of Covid-19 on Indigenous communities in Odisha (India) using a One-health lens</p> |

Institutionalization: AMR Governance Research

March 16, 2021 Designing One Health Governance for Antimicrobial Stewardship Interventions (DESIGN): **Global 1HN and Sonar Global collaboration**
Canada, Netherlands, Senegal, France, Philippines: proposal submitted to JPIAMR

1. Compare governance of AB stewardship across high-, middle- and low-income states
2. Scoping reviews: 2022
3. Comparative institutional, situational, systems, legal, impact analyses: 2022-2024
4. Design-thinking workshops: 2024

Spring 2021 Scoping review on governance of antimicrobial stewardship, and **accelerations in information, communication** and **urbanization**:
Raphael Aguiar (doctoral research)

Infectious disease governance research

2021-2022

Performance accountability and prevention of ID (HIV/AIDS, malaria, TB) in maternal health care in Sub-Saharan Africa:

1. Scoping review 2021
2. Develop selection criteria: case study states
3. Apply for funds: Comparative analysis of performance accountability and ID in maternal health care in Sub-Saharan Africa

THANK YOU
